SUMMARY

Senior Product Manager at Axis Bank and IIT alumnus with **3+ years in fintech**, owning digital payments across mobile banking and internet banking. Delivered **38% conversion lift** on the bill-pay funnel, **3X transaction growth** across **2M+ Citi-migrated users**, and the **first single-authentication multi-biller flow in Indian banking**. Ships AI-native side projects end-to-end: a Claude-powered Indian equity analyst and a RAG reading companion.

EXPERIENCE

Axis Bank

Senior Product Manager

Mumbai, India

Jul 2023 – Present

- Own the **Bill Pay** stack across Axis Mobile and NEO for Business, driving **₹6,000 Cr annual GMV** across retail, MSME, and corporate — one of the highest-GMV products in the Axis digital portfolio.
- Drove a **38% improvement in bill-to-payment conversion** through funnel analysis and removal of a mandatory registration gate, recovering abandoned-transaction volume at scale.
- Conceptualised and shipped **Bulk Pay & Bulk Autopay** — the **first single-authentication multi-biller payment flow in Indian banking** — collapsing a multi-step process into one authenticated action.
- Led Bill Pay and UPI onboarding for **2M+ Citi retail users** during the Axis-Citi migration, driving a **3X jump in digital payment adoption (23K → 72K monthly transactions)** in six months.
- Scaled Bill Pay across **three customer profiles** (Credit Card, NEO for Business, Corporate) to **20%+ activation per segment in month one**; grew biller registrations **26% in a single month (400K → 500K+)** via a low-CAC staff referral program.
- Launched a milestone-based cashback loyalty program driving **2X payment frequency**, then restructured it to **cut burn 60%** at flat engagement; owned the Credit Card Offers page driving a **14% lift in quarterly card spends**.
- Owned **GrabDeals** (₹250 Cr GMV) card-linked rewards portal; built an automated reconciliation system using **Power Automate & Copilot agents**, cutting manual reconciliation effort **50%**.

PROJECTS

ApplyPilot AI — Job Application Autofill · Solo Project · Chrome Web Store

2026

- Solo-shipped an **MV3 Chrome extension** that autofills job applications across Greenhouse, Lever, Ashby, and LinkedIn Easy Apply, with an opt-in generic scan for unknown ATS forms.
- Scoped to **4 high-traffic platforms** first instead of chasing the long tail; built **answer memory** so users type each side-question once, and enforced a shared design-token layer so visual drift between extension and marketing site is structurally impossible.

DailyPages — AI Reading Companion · Solo Project

2026

- Set **depth of engagement per session** as the north-star metric; mapped user signals across 7 reading moments and sequenced a 6-phase roadmap with hard scope gates to protect delivery timelines.
- Selected **Claude API** for long-form comprehension; set per-user AI spend guardrails ahead of monetisation and preserved a mock-data demo path to decouple design from engineering.

SKILLS

Core PM	Product Strategy & Roadmap, Go-to-Market, KPI Ownership, A/B Testing, Funnel & Cohort Analysis, Stakeholder Management, Agile, MVP Development, API Integration & Prototyping
AI & Automation	Claude API, Claude Code, Prompt Engineering, LLM APIs, RAG, Agentic AI, Microsoft Copilot, Power Automate, Figma Make
